FROSTOP

GB The FroStop system features a self-regulating heating cable that prevents cold water pipes, drains and sprinkler systems from freezing (FroStop Green/FroStop Black) as well as roofs and gutters (FroStop Black).

D Das FroStop-System besteht aus einem selbstregelnden Heizband, das Kaltwasserleitungen, Abflüsse und Sprinkler vor dem Zufrieren schützt (FroStop Green/FroStop Black) sowie Dächer und Fallrohre (FroStop Black).

F Le système FroStop comporte un ruban chauffant autorégulant, qui protège du gel les tuyauteries d'eau froide, les conduites d'évacuation et les systèmes de sprinklers (FroStop Green/FroStop Black), toitures et les gouttières (FroStop Black).

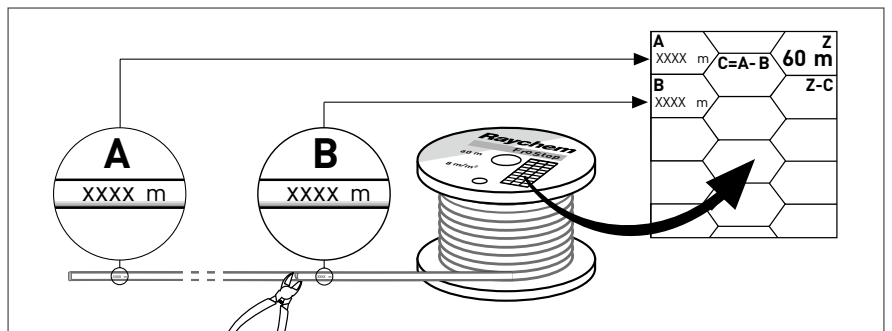

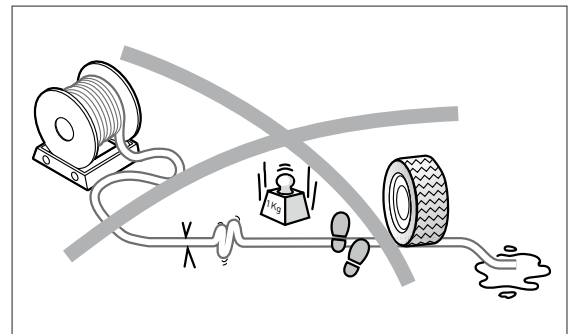

NL Het FroStop-systeem omvat een zelfregelende verwarmingskabel die voorkomt dat koudwaterleidingen, afvoerbuizen en sprinklersystemen bevriezen (FroStop Green/FroStop Black) en die daken en dakgoten beschermt tegen vorstschade (FroStop Black).

S FroStopsystemet består av en självreglerande värmekabel som förhindrar kallvattensrör, avlopp och sprinklersystem från att frysa (FroStop Green/FroStop Black), samt förhindrar tak och rännor från att frysa (FroStop Black).

N FroStop-systemet omfatter en selvregulerende varmekabel som sørger for at kaldtvannsrør, avløp og sprinkleranlegg ikke fryser (FroStop Green/FroStop Black). Varmekabelen sørger også for at tak og avløpsrenner ikke fryser (FroStop Black).

DK FroStop-systemet har et selvregulerende varmekabel, der forhindrer frostdannelse i koldtvdansrør, afløb og sprinkleranlæg (FroStop Green/FroStop Black) og tag og nedløbsrender (FroStop Black).

FIN FroStop itsesäätyvät lämpökaapelit estävät kylmävesiputkien, viemärien ja sprinkler-järjestelmien jäätyminen (FroStop Green/FroStop Black) sekä pitää sadevesijärjestelmät sulina (FroStop Black).

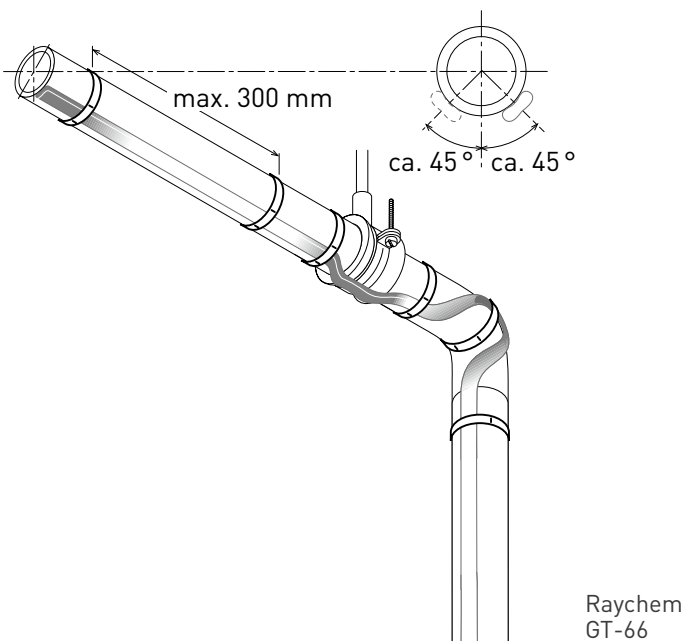

GB Raychem requires the use of a 30 mA residual current device to provide maximum safety and protection from fire. In addition to these instructions the „CE20-01 Installation Instructions” must be followed

D Im Interesse größtmöglicher Sicherheit (u.a. Vermeidung von Bränden) schreibt Raychem in Verbindung mit selbstregelnden Heizbändern die Verwendung von 30mA-FI-Schutzschaltern vor. Neben diesen Anleitungen müssen die „CE20-01 Installationshinweise” eingehalten werden.

F Un disjoncteur différentiel de 30 mA doit être prévu afin d'assurer une sécurité et une protection optimale contre l'incendie. Outre les présentes instructions, il y a lieu de se référer aux „Instructions d'installation CE20-01”.

NL Raychem vereist het gebruik van een 30 mA aardlekschakelaar, om een maximum aan veiligheid en bescherming te verzekeren tegen brand. Naast deze instructies blijven ook de „CE20-01 Installatie-instructies” van toepassing.

S För maximalt person- och branskydd skall 30 mA jordfelsbrytare användas. Förutom dessa anvisningar måste även „CE20-01 installationsanvisningar” följas.

N Raychem krever at det benyttes 30 mA jordfeilvern, for å oppnå maksimal sikkerhet og beskyttelse mot branntilløp. I tillegg til disse instruksjonene må også „Installasjonsinstrukser for CE20-01” følges.

DK Raychem kræver anvendelse af et 30 mA fejlstrømsrelæ for at opnå maksimal sikkerhed og beskyttelse mod brand. Ud over disse retningslinier skal instruktionerne i „CE20-01 installationsvejledning” følges.

FIN Mahdollisimman hyvän henkilö- ja palosuojauksen saavuttamiseksi on piirisuojauksessa käytettävä 30mA:n vikavirtasuojakytkintä. Näiden ohjeiden lisäksi on noudatettava „CE20-01 asennusohjeita”.
