## FOR SURFACE SNOW MELTING SYSTEMS

### DESCRIPTION

The nVent RAYCHEM SBS-XX-CM-20 control panel for ice and snow prevention systems provides a totally integrated electrical safety, connection and control solution for nVent RAYCHEM EM2-CM constant wattage heating mats for surface snow melting applications. The control panel comprises the VIA-DU-20 multi-sensor control unit for energy efficient ground surface heating, and integrated electrical safety devices. The SBS-XX-CM-20 panels offer solutions up to 18 maximum circuits of EM2-CM mats. The panel also includes electrical circuit protection devices (C-type circuit breakers) and residual current devices for safety and peace of mind. The panels need only be connected to the 400Vac (3 phase) supply.

### ADVANTAGES

Fast connection of multiple circuits directly into the control panel

- No need for additional connections terminals
  - 3-18 heating circuit can be connected and switched by a single panel
  - Circuit protection and safety devices integrated into the panel
- No need for separate safety devices
  - Complete system from the manufacturer
- System and components specifically selected for high performance ice and snow prevention system control
